TECH TALK 3.4

COVID-19 and the Future of Work

"COVID-19 has dramatically disrupted the economy and altered work as we know it. To pivot to the next "normal," we must reimagine what economic progress will look like and how the new workplace and workforce will support it."

June 24, 2020 | 4:00-5:30 PM

Virtual Zoom Cast

DRIVING
TECHNOLOGY

SUMMARY

COVID-19 has turned economic thinking upside down, leaving organizational leaders to consider new ways to work. Firms are responding by rethinking the modern workplace and traditional management science.

Accelerating the transition is the increase in the use of automation, artificial intelligence (AI), and other complex technologies. Early adopters of these technologies are already distancing themselves from the rest of the pack.

Leaders will have to successfully navigate workplace changes forced by COVID-19 while leveraging the new technologies infiltrating every industry. This tech-talk will explore economic and technological aspects of this challenge. Join us for this dive deep into the future of work.

REGISTRATION

NMTC Members \$20, Guests: \$35, with proceeds contributing to NMTC's *LIFTS (Laptops Inspire Future Tech Students)*, for dis-advantaged students at home. [Event Registration](#)
