## Fresh Brewed Science

Science Cafés are a **FUN AND FREE** way **FOR EVERYONE**, scientists or not, to learn about a specific science and technology topic that affects our everyday lives, from a local expert. Drop in for a coffee and stay for the discussion.

All are welcome

SCIENCE CAFES ARE... **FREE!**

Registration is advised

Soldier survival depends on the ability to protect the body and head from trauma by ballistic objects. Protection offered by uniforms and helmets relies on materials science, engineering and advances in manufacturing. Join us as we explore advances in soldier protection, and explore the potential of robots to improve survivability – from work conducted right here in Harford County.

Dr. Shawn Walsh and Dr. Lionel Vargas-Gonzalez are scientists at U.S. Army Research Lab, at Aberdeen Proving Ground, working in the areas of Soldier Protection.
