The Electronic Numerical Integrator and Computer (ENIAC) was one of the earliest general purpose computers ever made and its development is considered the turning point for the computing and supercomputing age that has followed. Join us as we explore advances in computing and networking from the late 20th Century to today through the lens of computing milestones created right here in Harford County.

Dr. Raju Namburu is Chief of the Computational Sciences Division, Computational & Informational Sciences Directorate, U.S. Army Research Lab, at Aberdeen Proving Ground.
